

Testing

Crispin's new range has undergone compression testing to validate the new design features. Results showed that the new Arcus lines: flexible, semi-rigid, and rigid, vary in stiffness which is directly proportional to the thickness of the longitudinal ribs.

Revolutionising movement technology

A brand of AM Healthcare Group

FOOT ORTHOSES REIMAGINED

Step into Crispin's Ultimate 3D Foot Orthoses Range

Crispin: The team behind the vision

Quality

A strong combination of clinical proficiency and extensive in-house printing capabilities deliver on quality and performance.

Clinical Expertise

Their extensive clinical knowledge drives the innovation behind their patient-focused 3D products.

Innovation

Pioneers in 3D printing technology for Prosthetic and Orthotic industry.

Endorsement

Trusted by healthcare professional worldwide, printing over 65.000 orthoses since 2018.

Customer-focused Service

We focus on understanding our customers needs to offer advice, produce quality orthoses with a delivery time to expedite care.

Crispin 3D Foot Orthoses Range

Arcus

Features and benefits:

- Low profile foot orthosis
- Stiffness can be adapted to individual needs through:
 - 4 longitudinal ribs of variable thickness
 - Optimised central thickness maintained
 - Increasing heel cup height from 5-20mm
- Offering a range of high quality mid layer and top cover materials
- Full range of foot orthoses additions to optimise results from met bars, heel cushions and more!

Ultimus

Features and benefits:

- UCBL design to increase tri-planar control
- Stiffness can be adapted to individual needs through:
 - 4 longitudinal ribs
 - Thickness of ribs
 - Optimised central thickness maintained
 - Increasing heel cup height from 25-50mm
- Range of Quality mid layer and top cover material
- Full range of foot orthoses additions to optimise results from met bars, heel cushions and more!
